

SC HINGED SHUTTER FIBRE OPTIC THROUGH ADAPTERS

JCS Technologies range of high quality zirconia sleeve through adapters includes all the most common types in reduced flange style for easy patch panel integration.

JCS SC Simplex fibre optic hinged shutter adapters are specially designed with integrated safety features suitable for FTTH and other telecom applications.

The shutters are designed to prevent ingress of dust and also to prevent accidental exposure to laser. The shutter displays a warning label to indicate laser risk. The performance of the adapters have been carefully designed to meet the toughest Telcordia standards.

All adapters come with high quality dust caps which can also be purchased separately if requiring extra. Inner shutter and shutter clip to attach to standard adapters are also available.

SC SIMPLEX BODY COLOUR CODING PER Telcordia and IEC STANDARD

-  Singlemode SM 9um (0° = UPC) - BLUE
-  Singlemode SM 9um (8° = APC) - GREEN
-  Multimode OM1 62.5um - BEIGE
