

Automatic Alcohol Dispensing Bottle with Lock

The one touch pump handles aqueous or alcohol-based liquids. Only 0.7cc of fluid is pumped with each stroke, so fumes and waste are reduced. Fluid supply remains free of contaminants because dispensed fluid does not drain back into bottle. Both stainless steel pumps are attached to square, high-density polyethylene (HDPE) bottles in 100ml or 200ml sizes. Both utilize a locking top designed to prevent spillage.

- Dish type pump dispensers allow one-hand operation
- Perfect for labs and assembly work
- High-density polyethylene (HDPE) bottles
- Locking Top designed to prevent spillage
- 100ml and 200ml size
